1. Short bio: professional and scientific highlights

I am currently a Post-Doc researcher in the "Regenerative Technologies Lab" at the BioRobotics Institute of Scuola Superiore Sant'Anna, working on ultrasound technologies for regenerative medicine applications.

I obtained a M.Sc. Degree in Biomedical Engineering at University of Pisa in 2013 (full marks, cum laude) and in June 2017 the Ph.D. in Biorobotics (full marks, cum laude) at the BioRobotics Institute of Scuola Superiore Sant'Anna (SSSA), with a thesis regarding innovative therapeutic applications of ultrasound for targeted therapies.

My scientific activity has been characterized from the beginning by a strongly interdisciplinary and curiosity-driven approach. This allowed me to carry out innovative research efforts at the interface between different disciplines, such as robotics, therapeutic ultrasound, ultrasound imaging, materials science, and biotechnologies.

I am the author or co-author of 16 papers published on ISI journals and the author or co-author of 35 contributions to conferences. He is also the co-inventor of 4 patents.
